(3) The following end products are other foreign end products:

(a) The Defense Logistics Agency (DLA) has developed the Automated Best Value System (ABVS), an automated system that collects and analyzes offerors' past performance history and assigns a numeric score. Under ABVS, contracting officers will not necessarily award contracts to offerors with the lowest evaluated price, but are encouraged instead to consider past performance and other factors and to exercise good judgment in awarding to firms whose offers represent the greatest value to the Government.

(b) An offeror's past performance is an indicator of performance risk and will be scored on the basis of past

PAGE OF PAGES
8 8

performance in the same Federal Supply Class (FSC) as the supplies being solicited. ABVS scores are calculated monthly, remain in effect for the entire month, and are based on DLA consolidated performance history. There is an FSC score, which represents the offeror's DLA-wide performance for that FSC. There is also a DLA score, which reflects the offeror's overall performance for all FSCs at all DLA Inventory Control Points (ICPs), i.e., Defense Supply Centers Philadelphia, Richmond and Columbus.

(c) To determine the ABVS score, the Government will use the following performance indicators: delinquencies, length of delinquencies, order rejections (contractor caused cancellations), product nonconformances, and packaging nonconformances. The delivery portion of the ABVS score will consist of all delinquencies (CLINs that have not been shipped

in their entirety by the CDD), and order rejections for the rating period preceding the most recent 60 days. The quality portion will consist of all contractor-caused product and packaging discrepancies for the rating period preceding the most recent 30 days. To allow for delays in posting data, the

delivery score will exclude the most recent 60 days and the quality score will exclude the most recent 30 days. There are no grace periods in determining if a contract is delinquent.

(d) Negative performance data to be reflected in the ABVS score will be made available to Contractors through the DSCP General and Industrial (G & I) website. A Contractor may challenge any negative data it feels is inaccurate by submitting a challenge to the DSCP ABVS Administrator. To be considered, challenges must be accompanied by evidence that substantiates the claim (e.g., invoices, DD Form 250s, modifications.) The 'Center' field will identify the cognizant focal point for challenges. For those identified as

'DSCP', challenges must be sent to:

Defense Supply Center Philadelphia (DSCP)
ATTN: DSCP-PPA (ABVS)
700 Robbins Avenue
Philadelphia, PA 19111-5096

Phone: (215) 737-7844
FAX: (215) 737-7949

(e) ABVS scores are updated monthly. Though contractors may challenge negative data at any time, it is to the contractor's

advantage to challenge in a timely manner. Challenged data that has been investigated and validated prior to the next monthly ABVS update will be reflected in the new score. Challenges that are received before the end of the challenge period but are not resolved prior to the next monthly update will be flagged as challenged. Once the challenge is received, the ABVS score is flagged and will remain flagged until the challenge is resolved.

(1) When an ABVS score is flagged, the contractor reviewing ABVS data can see that its challenge has been received and is being investigated. The flag also alerts the contracting officer that certain data reflected in the offeror's score is being challenged and warrants further investigation by the contracting officer.

(2) When a discrepancy between the offeror's challenged data and the Government's data occurs, it becomes disputed data. The Government will make every effort to resolve the discrepancy expeditiously. However, the Government is the final authority for resolution of disputed data and its use in

the source selection process, and the contracting officer may make an award decision despite the existence of an unresolved challenge.

(f) An ABVS score does not determine an offeror's award eligibility, or technical acceptability, nor does it establish

or dictate a responsibility or nonresponsibility determination. The ABVS score used for evaluation will be that score in effect at the time offers are evaluated. There is no minimum volume of business required for a contractor to be scored. The contracting officer may consider the volume of

business on which the performance score is based as a measure of confidence in the score's indication of performance risk. A contractor with no performance history in the FSC will be given a score of 999.9, which will identify the contractor as

a new offeror in that FSC. New offeror status will not be grounds for disqualification for award. New offerors may be considered more favorably than scored offerors with a poor performance record. Also, the desirability of expanding the supplier base and possible competition enhancement in future procurements will be considered in the source selection decision when new offerors are present.

(g) Contractor caused discrepancies or delinquencies are reflected in ABVS scores as an indicator of past performance. Repair, replacement, or reimbursement of quality and packaging

defects does not provide relief from negative ABVS data. Contractor caused delivery extensions, regardless of consideration paid, will be reflected in the delivery score.

This solicitation contemplates an award based on fob destination prices as well as destination inspection. However, source inspection will be required for those offers based on fob origin prices. Accordingly, an evaluation factor

of \$250.00 will be added to any offeror's fob origin price, for purposes of determining the most advantageous offer received, price and other factors considered. Nothing in this

provision affects the right of the Government to perform or waive source inspection on any resultant order/contract.
